# Contenitori BOX 12 per spalla / BOX 12 units for wall system

NOVAMOBILI

## INFORMAZIONI TECNICHE / TECHNICAL INFORMATION

Il sistema modulare di BOX 12 per spalla è costituito da una serie di contenitori inseriti nei vani a giorno delle colonne a spalla, caratterizzati da un sottile perimetro strutturale.

Gli elementi BOX 12 a giorno si possono inserire su colonne P. 37, sono sempre senza schiena e proposti con divisioni a schema fisso. Sono disponibili in profondità 41 cm con una sporgenza dalle colonne a spalla di 7,6 cm sul lato frontale. Sono bifacciali, possono quindi essere inseriti su colonne bifacciali, con sporgenza di 3,1 cm sui due lati della composizione. /

*The BOX 12 range of modules designed for the wall system comprises a series of storage units that are housed in the open shelving in wall system columns and have a distinctive slim structural outer frame.*

*The BOX 12 open units can be housed in 37cm-deep columns, are always open-back units and come with partitions arranged in a set pattern. They come in a 41 cm depth and hence sit 7,6 cm proud of the front of the wall system columns. They are finished on both sides and can therefore be housed in double-sided columns, sitting 3,1 cm proud of both sides of the composition.*

Non sono possibili riduzioni. /  
No reductions can be made.

# Divisori verticali per spalla / Wall system vertical partitions

NOVAMOBILI

## INFORMAZIONI TECNICHE / TECHNICAL INFORMATION

I divisori verticali per spalla consentono di suddividere orizzontalmente i vani a giorno in due o più vani.

Sono disponibili in due spessori per le due situazioni di colonne con schiena o senza schiena.

Non sono attrezzabili con frontali. /

The wall system vertical partitions allow you to divide up open shelving horizontally into two or more compartments.

They come in a choice of two thicknesses to accommodate both column versions – with back panel or with open back.

They cannot be fitted with fronts.
